(Pages 80-155 of 2022-2023 catalog)

BUSINESS ADMINISTRATION

ASSOCIATE IN SCIENCE IN BUSINESS ADMINISTRATION FOR TRANSFER DEGREE 2.0

(MAJOR #C.2051.AS-T)

This Associate in Science in Business Administration for Transfer 2.0 (AS-T) Degree is intended to meet the lower division requirements for Business Administration for all CSU campuses. Students planning to transfer to institutions other than the CSU are encouraged to consult ASSIST.org and a Clovis counselor for program planning and course selection. Upon completion of this Associate in Science in Business Administration for Transfer (AS-T) Degree, students will be prepared for employment in business and industry as an entry-level analyst, office clerk/assistant, assistant bookkeeper, bank teller, data entry-clerk, and accounting clerk. Most common career opportunities with a baccalaureate degree include: administration in public and private organizations, marketing, manufacturing, accounting, and divisions within those organizations.

PROGRAM LEARNING OUTCOMES:

1. Define Business, list the five functions of business, and describe each function.
2. Utilize effective oral communication skills in a variety of situations (including one-on-one and group presentations) and using a variety of formats.
3. Write effective business letters, memos, research papers, and other documents.
4. Conduct research using a variety of resources including published documents and web-based resources.
5. Effectively and efficiently use technology (commonly used computers and software) as it relates to the world of business.
6. Discuss the basic accounting concepts and financial statements used regularly in business.
7. List and describe the major forces influencing human behavior in the workplace.

Students completing the Associate in Science in Business Administration for Transfer Degree 2.0 will be able to seamlessly transfer into the CSU system to pursue a baccalaureate degree in Business Administration. Students completing this degree will have an introductory foundation for the field of Business Administration through the study of accounting, computers, economics, law, and statistics or quantitative methods, and students will acquire specific analytical and problem-solving skills needed in the business environment. This degree is specifically intended to facilitate a seamless transfer into the CSU system, but it also provides the preparation necessary for immediate employment in the fields of entry-level analyst, office clerk/ assistant, assistant bookkeeper, bank teller, data-entry clerk, and accounting clerk.

To obtain this transfer degree, students must complete the following requirements (pursuant to SB1440 §66746 and CCR, title 5, §55063):

- Completion of 60 semester units or 90 quarter units of degree-applicable courses,
- Minimum overall grade point average of 2.0,
- Minimum grade of "C" (or "P") for each course in the major, and
- Completion of IGETC and/or CSU GE-Breadth.

PHYSICS

ASSOCIATE IN SCIENCE IN PHYSICS FOR UC TRANSFER DEGREE

(MAJOR #C.3665.UCTP)

In April 2018 the California Community Colleges (CCC) and University of California (UC) signed a Memorandum of Understanding (MOU) to enhance student transfer rates and improve the academic preparation of CCC students transferring to the UC system. The MOU began a comprehensive effort to develop programs which guarantee admission for all qualified CCC students seeking to transfer to the UC system. The University of California Transfer Pathways (UCTP) Guarantee pilot project in chemistry and physics is part of that effort.

The UCTP fulfills important priorities shared by the two systems:

Expanding access, especially at CCC campuses that traditionally have low transfer rates into the UC system. A key component of California's Master Plan and the Vision for Success is providing students transfer routes to four-year degrees, thereby enhancing California's workforce. By developing guarantees of admission based on Transfer Pathways, and promoting Associate degrees built on those Pathways, the two systems can change the perception among many CCC students that transferring to the UC system is an unrealistic goal. Guaranteed admission into the UC system (with a minimum 3.5 GPA) is therefore a major benefit to the UC Transfer Pathway. Note that like the Associate Degrees for Transfer (ADTs) created for the CSU system, UCTP guarantees admission into the UC system, but not necessarily to the student's first choice among the UC campuses.

Timely Degree Completion: thorough academic preparation is key to timely degree completion after transfer. Students who follow a UC Transfer Pathway and then maintain a full-time load after reaching their UC school can graduate within two years, as they will have completed the important lower-division courses needed to earn a degree in physics or chemistry.

The UCTP Physics is a degree for students seeking to transfer to a University of California campus as a physics major. This major will provide students with a full two years of physics education as well as a strong foundation in math and chemistry. Students who complete the UCTP Physics degree (with a minimum 3.5 GPA) will be guaranteed admission to the UC

system. Upon completion of college-wide graduation requirements and the required specialized degree courses with at least a 'C' grade in each course, the student will be awarded an Associate of Science degree.

PROGRAM LEARNING OUTCOMES:

1. Apply the Laws of Physics, physical concepts, and mathematical knowledge to solve problems in physics.
2. Demonstrate skill in scientific communication (both written and oral) by describing the results of laboratory experiments, and by providing other technical information, in a clear and concise manner.
3. Use experimental techniques in the laboratory to obtain accurate and precise data, to validate scientific theories, and to evaluate and properly use scientific instruments.
4. Prepare students for seamless transfer to a UC as a Physics major, or in a related field.
5. Provide students with a core body of knowledge for understanding physics.
6. Prepare students for advanced studies in the field of physics.

Catalog Description:

The UCTP Physics is a degree for students seeking to transfer to a University of California campus as a physics major. This major will provide students with a full two years of physics education as well as a strong foundation in math and chemistry. Students who complete the UCTP Physics degree (with a minimum 3.5 GPA) will be guaranteed admission to the UC system. Upon completion of college-wide graduation requirements and the required specialized degree courses with at least a 'C' grade in each course, the student will be awarded an Associate of Science degree.

Students should consult with a counselor for more information on university admission and transfer requirements, as this degree in physics may not be the best option for students intending to transfer to a particular UC campus or to a college or university that is not part of the UC system.

UCTP Physics degree, students must fulfill the following:

- Complete 41 semester units in Physics major preparation and IGETC* courses, as prescribed below.

- Achieve a cumulative minimum grade point average of 3.5 in the major. (Students who earn less than a 3.5 GPA in UC transferable courses will still meet the associate degree graduation requirement, but will not receive guaranteed admission into a UC).
- Achieve a “C” grade or better, or “P”, in all courses required for the major. Although a “P” grade is allowed (Title 5 section 55063), it is highly recommended that students take the course for a letter grade (A, B, or C) due to unit limitations on “P/NP” courses by the UC system.
- Complete a minimum of 12 units in residence at Clovis Community College.

**NOTE: The degree allows for the deferment of two courses in Area 3 (Arts and Humanities) and two courses in Area 4 (Social Science) of the IGETC. These are to be completed at the UC, once transferred.*

PHYSICS

ASSOCIATE IN SCIENCE IN PHYSICS FOR TRANSFER DEGREE

(MAJOR #C.3664.AS-T)

Catalog Description:

Physics is the experimental investigation and theoretical explanation of physical phenomena, including motion, matter, energy, and the fundamental forces of nature. The program at Clovis Community College prepares students for transfer in the physical sciences, engineering, computer science, and the life sciences. Kinematics, Newtonian dynamics, gravity, fluids, waves, sound, thermodynamics, electricity, magnetism and optics are emphasized. Important topics from modern physics are also covered: relativity, quantum mechanics, and atomic and nuclear physics.

A physics student acquiring the Associate in Science Degree in Physics for Transfer (AS-T in Physics) generally transfers to a four-year institution to complete a bachelor's degree. Physics graduates at the bachelors' level are qualified for a variety of technical positions with government or industry, and they are also well prepared to enter a graduate program in any other science or in engineering. Physics majors are welcomed into professional programs such as law, business, or medicine. Teaching at the high school level with a bachelor's degree or at a two-year college with a masters' degree are additional career options for the physics major. For the physicist who obtains the Ph.D., experimental or theoretical research and/or teaching at the university level or basic research in government or industry are options for gainful employment.

Many four-year colleges and universities offer bachelor's degrees in physics. There are some systems and institutions that offer the advanced degrees in physics. Requirements vary from system to system and from campus to campus for each level of degree. The advice of a counselor and consultation of institutional catalogs for specific information is highly recommended.

To obtain the Associate in Science Degree in Physics for Transfer (AS-T in Physics), students must complete the following requirements

- Completion of 60 semester units or 90 quarter units of degree-applicable courses,
- Minimum overall grade point average of 2.0,
- Minimum grade of "C" (or "P") for each course in the major, and
- Completion of IGETC and/or CSU GE-Breadth.

ADTs also require that students must earn a C or better in all courses required for the major or area of emphasis. A "P" (Pass) grade is not an acceptable grade for courses in the major.
